Subject: California Inland Beach Monitoring Workgroup Kickoff!

California Water Quality Monitoring Council

You are invited to join the Inland Beach Monitoring Workgroup! California has thousands of lakes, rivers, and streams that are used for recreation. Currently there is no comprehensive program to monitor or report inland beach water quality, but there are agencies, citizen science organizations, and other groups across the state collecting data. We need partners to help coordinate and promote these efforts, as well as develop tools to inform the public about inland beach water quality. If this interests you, please join us and share your ideas.

The Inland Beach Monitoring Workgroup is part of the [Safe-to-Swim Network](#), under the umbrella of the [California Water Quality Monitoring Council](#).

Save the Date: The first full meeting of the Inland Beach Monitoring Workgroup will be on **Monday, February 25th, 1-3pm PST** at the CalEPA building in downtown Sacramento. Room and web conferencing details will be sent out the week before.

The agenda will include:

1. Introductions
2. A quick history of the Inland Beaches Workgroup
3. Overview of the Safe to Swim Network and charter development
4. Discussion on objectives for the Inland Beaches Workgroup (add your ideas [HERE](#))
5. Next steps and future meeting dates

RSVP: If you plan to attend the meeting on February 25th or future meetings, please take this quick [SURVEY](#) to tell us a little about yourself.

Stay Informed: To receive future announcements and updates, sign up for our new email list by visiting the Water Boards' [Email List Subscription Form](#) and selecting **Inland Beach Monitoring Workgroup** under General Interests/Monitoring Council Workgroups.

Please let me know if you have questions or feedback. And share this information with anyone you think would be interested in participating. I hope you can participate in this new effort!
